

ASBESTOS AWARENESS

As part of our range of services, Precise offers Asbestos Awareness training courses.

The goal of these courses is to provide the necessary training to people who are involved with or are likely to disturb asbestos-containing materials during their normal work activities.

The following list outlines the topics covered in the course. Precise can tailor the courses and add or remove topics to suit the client's requirements.

- About Asbestos
- Brief History of Asbestos
- Asbestos Containing Materials
- Asbestos Related Diseases
- PPE and RPE Requirements
- Managing Risk
- Asbestos Surveys
- Asbestos Removal
- Overview of Relevant Legislation
- Clearance Inspections
- Air Monitoring & Analysis

It is recommended that refresher training courses are undertaken on an annual basis. The courses will include any relevant updates to legislation, case studies, and a follow up to ensure that information has been retained from both the original training and new information.
